

EPAL EURO PALLET

800 x 1,200 mm

The work of the European Pallet Association, its National Committees and licensees forms the stable basis for the successful, open pallet pool and enables the global exchange of EPAL load carriers. There are more than 650 million EPAL pallets in circulation around the globe that are used throughout the sector and it would be impossible to imagine industry and logistics without them. Their meticulous adaption to the needs of the market has enabled the alignment of nearly all warehouse and transport systems throughout Europe to the standard dimensions. Constant quality assurance and high quality materials ensure trouble-free, safe performance for users and loading. Their multiple use saves a considerable amount of environmental and economic resources.

FACTS & FIGURES

Materials: 11 boards of quality timber, 9 woodchip or solid wood blocks, 78 nails. Produced according to the EPAL Technical Regulations.

Length	800 mm
Width	1,200 mm
Height	144 mm
Weight	Approx. 25 kg
Safe working load	1,500 kg

When stacking laden pallets on a solid, even surface, the bottommost pallet must not exceed a load of max. 5,500 kg.

MARKINGS

On the left- and righthand corner block:
"EPAL in oval"

On the middle block:
IPPC rectangle with IPPC ear of wheat, country code, pallet producer's IPPC number, HT (Heat Treatment); EPAL ID number with pallet producer's licence number and date of production (year, month);
EPAL control staple (on only one of the middle blocks):

HANDLING

EPAL Euro pallets' accessibility from all four sides and bottom boards chamfered on both sides of EPAL Euro pallets allow them to be handled extremely efficiently across the whole supply chain. EPAL Euro pallets are compatible with all industrial trucks and are also suitable for use in machines or with conveyor technology and high-bay racking (MCH).

QUALITY CONTROL

EPAL's quality assurance ensures EPAL Euro pallets are of an internationally uniform and high quality. The inspection companies Bureau Veritas and CCIC complete more than 25,000 independent inspections every year

on behalf of EPAL at the EPAL licensees' premises. This quality control of EPAL Euro pallets is the fundamental basis of reuse and exchange and therefore of the sustainability of EPAL Euro pallets.

ISPM 15

During production, EPAL Euro pallets are heat treated (HT) in accordance with the IPPC ISPM 15 standard. This kills off any pests and protects trees, plants and other ecosystems from infestation. The ISPM 15 treatment ensures

EPAL Euro pallets can be used to transport goods without limitation, internationally and across continents.

REPAIR

Damaged EPAL Euro pallets are cost-effectively repaired by more than 1,000 repair operations licenced by EPAL. Damaged QR codes can be reprinted or replaced while repairing EPAL Euro QR pallets. Repaired EPAL Euro pallets are marked on one of the middle blocks with an EPAL repair marking nail (with the EPAL logo and the repairer's licence number). The EPAL licence is evidence of the reliability of the repair operation and the high quality of the repair.
